AI RITUAL / INTELLIGENCE REPORT

SEO & GEO Website Audit

https://sample-business.test

Automated public-data review of website health, content quality, AI-search readiness, and actionable improvements.

Audit reference: sample

Completed: 2026-10-21T09:02:00Z

Report contains source-linked findings, scores, limitations, and a phased action plan.

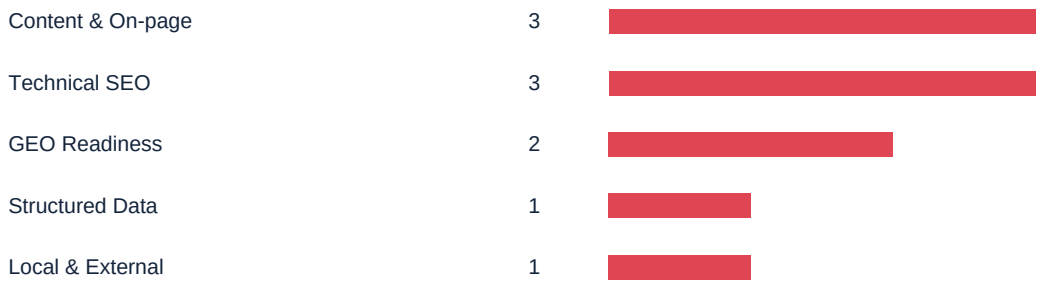
Executive summary

This illustrative business website has a reasonable basic technical foundation but would benefit from stronger content, clearer entity information, and improved access to service explanations. The sample review identifies metadata weaknesses, incomplete machine-readable company details, and gaps in page structure. Priority recommendations focus on the most important service pages first, followed by structured data, internal linking, and a renewed sitemap review. The figures in this sample do not reflect a real website or live search rankings.

DIMENSION	SCORE
Overall health	67%
Technical SEO	71%
Content quality	62%
GEO readiness	58%

Crawl coverage: 24 pages crawled, 81 URLs discovered, 2 inaccessible pages. Issues: 0 critical, 2 high, 4 medium, 2 low, 2 opportunities.

Issue distribution



Detailed findings

AR-0001 Missing meta description

HIGH · Content & On-page · Estimated effort: Low

Affected URL: https://sample-business.test/services

Evidence: The services page has no meta description.

Why it matters: Search snippets may lack helpful service context.

Recommended correction: Write an accurate summary of the services and customer next step.

AR-0002 Inconsistent page titles

MEDIUM · Content & On-page · Estimated effort: Low

Affected URL: https://sample-business.test/about

Evidence: Two pages use the generic title “Home”.

Why it matters: Searchers cannot easily distinguish pages.

Recommended correction: Create descriptive, unique titles for each service page.

AR-0003 Missing descriptive image text

MEDIUM · Content & On-page · Estimated effort: Low

Affected URL: https://sample-business.test/portfolio

Evidence: Seven content images contain empty alt text.

Why it matters: Useful imagery should be accessible.

Recommended correction: Add alt descriptions for informative images and preserve empty alt on decorative images.

AR-0004 XML sitemap not verified

MEDIUM · Technical SEO · Estimated effort: Low

Affected URL: https://sample-business.test/sitemap.xml

Evidence: A standard sitemap location was not accessible.

Why it matters: Search engines may miss deeper pages.

Recommended correction: Verify sitemap coverage and publish a discoverable, valid XML sitemap.

AR-0005 Canonical declarations not detected

LOW · Technical SEO · Estimated effort: Low

Affected URL: https://sample-business.test/services

Evidence: No canonical link was found in the HTML.

Why it matters: Duplicate URLs may split indexing signals.

Recommended correction: Add canonical tags if needed for duplicate and alternate URLs.

AR-0006 Homepage organization structured data missing

MEDIUM · Structured Data · Estimated effort: Medium

Affected URL: https://sample-business.test/

Evidence: No Organization JSON-LD was detected.

Why it matters: Business identity information could be clearer to machines.

Recommended correction: Add accurate JSON-LD with business name, website and verified contact information.

AR-0007 Sparse service content

HIGH · GEO Readiness · Estimated effort: Medium

Affected URL: https://sample-business.test/services

Evidence: The key service page contains fewer than 100 readable words.

Why it matters: AI tools have limited direct answers to extract.

Recommended correction: Publish an accessible service description, FAQs, benefits and clear contact steps.

AR-0008 Long text missing section headings

LOW · GEO Readiness · Estimated effort: Medium

Affected URL: https://sample-business.test/about

Evidence: The company overview has no H2 or H3 headings.

Why it matters: Structured passages are easier to navigate and cite.

Recommended correction: Group topics under concise descriptive headings.

AR-0009 Review Google Business listing

INFO · Local & External · Estimated effort: Medium

Affected URL: https://www.google.com/maps

Evidence: Business listing could not be verified in this preview.

Why it matters: Profile visibility and ownership were not assessed.

Recommended correction: Use the business owner account or an authorized API for verification.

AR-0010 Improve internal links

INFO · Technical SEO · Estimated effort: Medium

Affected URL: https://sample-business.test/services

Evidence: Service pages lack contextual links to related resources.

Why it matters: Visitors may struggle to find next steps.

Recommended correction: Add relevant internal links to FAQs, examples and contact actions.

Implementation roadmap

First 7 days — Higher-priority fixes

• Publish complete text-based service descriptions

• Add missing meta descriptions to key landing pages

Days 8–30 — Content and crawl improvements

• Review sitemap and canonical URLs

• Implement accurate business identity structured data

Days 31–90 — Refinement and verification

• Improve internal linking

• Repeat the audit to verify changes

Page inventory

URL	HTTP	WORDS	TITLE
https://sample-business.test/	200	380	Sample Business | Home
https://sample-business.test/services	200	92	Services
https://sample-business.test/about	200	340	Home

External business profiles

https://www.google.com/maps — not verified. Sample only; no request made.

Methodology and limitations

• This is illustrative demo content. No real website was crawled.

• Real audits only scan public HTML and do not measure observed AI citations or rankings.
